EDITION

1983 Arizona Vital Statistics

Bruce Babbitt, Governor
State of Arizona

Lloyd F. Novick, M.D., M.D.H., Director
Arizona Department of Health Services

All services and programs administered by the Arizona Department of Health Services are rendered on a non-discriminatory basis without regard to handicap, race, religion, color, sex or national origin in compliance with the Rehabilitation Act of 1973 and Title VI of the Civil Rights Act of 1964. All applicants for services and/or program participation have a right to file complaints and to appeal according to regulations governing this principle. The Department's Civil Rights and Section 504 Coordinator is located at 1740 West Adams Street, Room 409, Phoenix, AZ 85007, phone (602) 255-1030.

Introduction

The **1983** edition of the *Arizona Vital Statistics Report is a statistical summary of vital events for calendar year* **1983.** Data relating to population, births, deaths, fetal deaths, marriages, divorces and abortions are included. Although most of the data in this report pertain to events occurring in **1983,** some data for prior years have been included. Most of the data in this report refer to Arizona residents. Some events, however, such as marriages and divorces are tabulated to where the event occurred rather than the residence status of the party or parties involved.

As a certain number of Arizona residents either deliver babies or die out of state each year, it is necessary to include data obtained from the certificates of other states in any residence tabulations pertaining to Arizona residents. The report includes all such out-of-state certificates and all in-state certificates received prior to March 15, **1984.** Although a few records for calendar year **1983** were received after thse filing dates, their exclusion from this report is statistically insignificant.

Please note that starting January 1, **1983,** the northern portion of Yuma County became Arizona's 15th county-La Paz. It is important to note this when reviewing trend data for Yuma County before and after January 1, **1983.**

Any additional needs for data or analyses should be directed to the Research and Statistical Analysis Section, Office of Information Services. The office will make every attempt to comply with requests for data within the limitation of staff and resources.

Data Collection and Definitions

Sources of Data

Information of births, deaths and fetal deaths is compiled from the original documents filed in the Vital Records Section and from transcripts of original certificates filed in other states but affecting Arizona residents. (Copies of certificates for births and deaths occurring outside the United States are not sent to Arizona.

This report includes all 1983 births and deaths for which records were received before March 15, 1984, but excludes certificates and transcripts received after that date. Because the number of 1983 vital events which are not included is small, the figures shown are relatively complete counts and are considered satisfactory as descriptive statistics.

Arizona presently has no central registry for marriage and divorce records. Annual statistics are limited to counts of such records furnished by the Clerk of the Superior Court in each county.

Population

Population estimates were prepared by the Department of Economic Security of Arizona and the U.S. Census Bureau.

Race/Color

In accordance with the practice of the United States Census Bureau, persons of Mexican origin are classified as "white." Starting in 1978, Yaqui Indians were no longer classified as white but as American Indian. The American Indian figures include those living both on and off the reservation.

Rates

Birth Rate—Number of resident live births divided by total resident population X 1,000

Cause-Specific Rate—Number of deaths due to a specific cause divided by total resident population X 100,000

Death Rate—Number of resident deaths divided by total resident population X 1,000

Divorce Rate—Number of Occurrences (divorces and annulments) divided by total resident population X 1,000

Fetal Death Rate—Number of resident fetal deaths divided by total resident live births X 1,000

Infant Mortality Rate—Number of infant deaths divided by total resident live births X 1,000

Low-Weight Birth Rate—Number of low-weight births divided by total resident live births X 1,000

Marriage Rate—Number of persons married divided by total resident population X 1,000

Neonatal Death Rate—Number of neonatal deaths divided by total resident live births X 1,000

Reliability of Rates

Many of the rates shown in this report are based on a small population, a small number of events, or both. The rates based on small numbers may be questionable due to chance factors and should be used with caution. Rates for counties with small populations also may vary considerably from year to year. In addition, one must make allowances for differences in age distributions, etc., for which rates may not be adjusted. Consequently, caution must be taken in forming conclusions on the basis of various rates without taking additional factors into consideration.

Definitions

Birth Weight—Weight of fetus or infant at time of delivery.

Fetal Death—Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy. The death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

Infant Death—Death occurring to an individual of less than one (1) year of age.

Live Birth—The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

Low-Weight Birth—Birth wherein the birth weight is equivalent to 2,500 grams or less (approximately 5 lbs., 8 ozs.).

Neonatal Death—Deaths occurring to an individual of less than 28 days of age.

Occurrence—Place where the event actually occurred.

Race—Race for mother, father or decedent is as stated on certificate. Race of child is determined from race of the parents.

Residence—Usual place of residence for person to whom event occurred. For births and fetal deaths, residence is defined as the mother's usual place of residence.

Total Births—Total live births.

Underlying Cause of Death—That condition giving rise to the chain of events leading to death.

ERRATA for ARIZONA VITAL STATISTICS

1983 EDITION

Please make the following corrections:

Page

2. The Maricopa County population for 1983 should be 1,633,100, not 13,000.

2. The Yuma County population for 1982 was 94,900. On January 1, 1983, the Northern section of Yuma County became La Paz County. The 93,700 under 1983 is the total population of the new Yuma and La Paz Counties added together to show the decrease in total population for the area.

27. Under total fetal deaths, non-white for La Paz County is a one (1), please change it to a dash (-).
On the same line under Yuma County is a one (1), please change it to a two (2).

44. Under facility, hospital for 1982 is 3,584, please change it to an eight (8).
